PROFESSIONAL SUMMARY

Aspiring Software Engineer with hands-on experience in full-stack web development using React, Next.js, TypeScript, Node.js, and PostgreSQL. Skilled in building scalable applications, REST APIs, and AI-powered systems using Docker and modern development practices.

EDUCATION

SAGE University, Indore

Bachelor of Technology in Computer Engineering CGPA: 8.40

Sep 2022 – Present

TECHNICAL SKILLS

AI & Generative AI: LLM Integration, Prompt Engineering, RAG, LangChain, LangGraph, LangSmith, AI Agents, Multi-Agent Orchestration, Vector DB, Pydantic

Languages: C++, TypeScript, JavaScript, Python, SQL, HTML/CSS

Frontend: React, Next.js, Tailwind CSS, Shadcn UI, React Hook Form, Zod, Redux

Backend: Node.js, Express.js, FastAPI, Flask, REST APIs, Go, JWT, WebSockets

Databases: MongoDB, PostgreSQL, Firebase, FAISS, Pinecone

DevOps & Tools: Docker, Docker Compose, GitHub Actions, AWS, CI/CD, Vercel, Netlify, Git, Postman

EXPERIENCE

Frontend Developer Intern — Vaishalitech (Remote)

Jun 2025 – Sep 2025

- Developed core admin panel features including order listing and creation using React, Tailwind CSS, and Redux.
- Built reusable and responsive UI components to ensure scalable and consistent design.
- Integrated REST APIs for real-time data handling and smooth admin workflows.

Full Stack Developer Intern — Tradegospel (Remote)

Sep 2025 – Nov 2025

- Developed a full-stack trading education platform to help new traders understand live stock markets and investment strategies.
- Implemented real-time stock data visualization to display live profit, loss, and historical trading performance.
- Built interactive dashboards showing user-wise earnings, losses, and complete transaction history using live APIs.

PROJECTS

InsightLoop — AI-Native Business Intelligence Platform

Next.js 14, FastAPI, LangChain, LangGraph, Claude API, PostgreSQL, Redis, Docker

- Built a full-stack AI-powered BI platform where users connect data sources and query them in plain English.
- Designed a 5-agent LangGraph pipeline: Query Writer, Data Analyst, Chart Selector, Narrative, and Report Compiler agents orchestrated via a state machine.
- Implemented real-time agent trace streaming over WebSockets so users see each pipeline step as it executes.
- Automated PDF report generation and email delivery via Celery-scheduled background jobs with S3 storage.

NexusAI — Enterprise Support Agent Orchestrator

Python, FastAPI, Multi-Agent Systems, Docker

- Built an enterprise-grade multi-agent AI customer support system with intelligent query routing.
- Designed an orchestrator agent to classify and forward queries to specialized agents.
- Developed REST APIs with CORS support and containerized the system using Docker.
- Implemented structured logging and error handling to improve system reliability and debugging.

CERTIFICATIONS & ACHIEVEMENTS

- Developing Front-End Apps with React — Coursera
- Knight rank on LeetCode (800+ DSA problems solved)
