PROFESSIONAL SUMMARY

AI Engineer with expertise in LLM applications, multi-agent systems, and RAG pipelines. Full-stack developer skilled in Python, FastAPI, Next.js, and building production-ready AI systems deployed on Vercel, Railway, and HuggingFace Spaces.

EDUCATION

SAGE University, Indore Bachelor of Technology in Computer Engineering Sep 2022 – 2026
CGPA: 8.38

TECHNICAL SKILLS

AI & Generative AI: LLM Integration, Prompt Engineering, RAG, LangChain, LangGraph, LangSmith, AI Agents, Multi-Agent Orchestration, Vector DB, Pydantic
Languages: Python, C++, TypeScript, JavaScript, SQL, HTML/CSS
Frontend: React, Next.js, Tailwind CSS, Shadcn UI, React Hook Form, Zod, Redux
Backend: FastAPI, Flask, Node.js, Express.js, REST APIs, JWT, WebSockets
Databases: MongoDB, PostgreSQL, Firebase, FAISS, Pinecone
DevOps & Tools: Docker, Docker Compose, GitHub Actions, AWS, CI/CD, Vercel, Netlify, Git, Postman

PROFESSIONAL EXPERIENCE

Frontend Developer Intern — Vaishalitech (Remote) Jun 2025 – Sep 2025

- Developed comprehensive admin dashboard with React and Redux managing order workflows including listing with filtering, creation, and full CRUD operations.
- Built reusable UI component library (forms, data tables, modals, notifications) following consistent design patterns for scalability.
- Integrated REST APIs with comprehensive error handling, loading states, and optimistic UI updates for seamless real-time synchronization.

Full Stack Developer Intern — Tradegospel (Remote) Sep 2025 – Nov 2025

- Built full-stack trading education platform using React and Node.js/Express for learning live stock markets and investment strategies.
- Implemented real-time stock visualization with Chart.js and live APIs displaying profit/loss, trends, and technical indicators (RSI, Bollinger Bands, MACD).
- Developed interactive dashboards with earnings tracking, win rates, risk analytics, and responsive design for desktop, tablet, and mobile.

PROJECTS

Enterprise RAG System
Python, FastAPI, Next.js 14, Docker, Prometheus, Grafana, Jaeger, PostgreSQL, Qdrant, Redis

- Built production-ready RAG platform with end-to-end workflow orchestration including document ingestion, semantic chunking, hybrid search, reranking, and LLM generation with citation extraction.
- Designed 100% offline-first architecture with deterministic answering, optional Gemini integration, and multi-provider LLM router supporting Claude, OpenAI, and Ollama.
- Architected FastAPI backend with vector store, Redis caching, scalability adapters for Qdrant/Weaviate, Prometheus/Grafana monitoring, Jaeger tracing, and 56 pytest tests.

Smart Coaching Platform — AI Coaching Institute
LangGraph, Groq, Gemini, Supabase, Qdrant Cloud, FastAPI, Next.js 14, React 18

- Engineered AI coaching platform for JEE/NEET using 8 LangGraph agents for doubt resolution, adaptive tests, progress tracking, at-risk detection, parent reports, and rank prediction.
- Implemented 6 RAG patterns (Agentic, HyDE, RAPTOR, CRAG, web fallback, CrossEncoder) with LLM fallback chain ensuring reliability and cost optimization.
- Architected multi-tenant system on Supabase + Qdrant Cloud, deployed FastAPI on HuggingFace Spaces, Next.js on Vercel, React Native via Expo, entirely on free-tier services.

InsightLoop — AI-Native Business Intelligence Platform
Next.js 14, FastAPI, LangGraph, Claude API, PostgreSQL, Redis, Celery, Docker

- Developed AI BI platform enabling non-technical users to query databases (PostgreSQL, MongoDB, APIs, CSV) in natural English using 5-agent LangGraph pipeline.
- Implemented real-time WebSocket streaming showing agent execution steps with metrics, integrated Claude API for query understanding and context-aware generation.
- Built automated PDF report generation via Celery/S3, deployed frontend on Vercel, backend on Railway with auto-scaling, live at insightloop-eta.vercel.app with full authentication.

CERTIFICATIONS & ACHIEVEMENTS

- Developing Front-End Apps with React — Coursera Certificate in React
- LeetCode Knight Rank — Top 5% globally with 800+ problems solved
